Overall costs of the Project	USD 992 039
The Break-even point of Project	3 year
The Proposal of Investment's activity	Privileged credit
<b>INVESTMENT'S PROPOSAL №2</b>	
Name of the Project	Development of highly productive breeds of hens
The purpose of the Project	Development of poultry raising in area by the development of highly productive breeds of hens for provision of the population poultry farming production (egg and meat)
The brief description of the Project	Project is involved with agricultural activity with usage of available facilities for poultry production
Overall costs of the Project	USD 97 940.5
The Break-even point of Project	4 years
The Proposal of Investment's activity	Joint activity, direct investments
<b>INVESTMENT'S PROPOSAL №3</b>	
Name of the Project	Organization of a fish trout economy
The purpose of the Project	- The organization of a fish trout economy for manufacture and cultivation of a commodity trout; - Realization and maintenance of local population live and cold fish; - Decrease in poverty of local population at the expense of depreciation of realization of fish on shops; - Granting to local population of new workplaces
The brief description of the Project	Use of the empty earths under the organization of a

	fish economy on cultivation of a trout, that thereby will provide local population with work
Overall costs of the Project	USD 240556,0
The Break-even point of Project	2-3 years
The Proposal of Investment's activity	Joint activity, direct investments
<b>INVESTMENT'S PROPOSAL №4</b>	
Name of the Project	Increase of resource potential of agricultural lands
The purpose of the Project	The purpose is to increase of resource potential of agricultural lands on the basis of perfection of its branch structure
The brief description of the Project	Fully rehabilitation of the main production resources
Overall costs of the Project	USD 4 191 000
The Break-even point of Project	3 years
The Proposal of Investment's activity	Soft loan
<b>INVESTMENT'S PROPOSAL №5</b>	
Name of the Project	Develop of apricot garden and vineyard
The purpose of the Project	The development of complex of scientific and technical activities of the productivity increase in apricot garden and vineyard, by means of the restoration and planting of high-grade saplings.
The brief description of the Project	The contribution of the relevant project to the development of national economy and region consists of the followings: Preservation of garden and vineyard areas under the farmer beginning Cultivation of demanded grades of apricot and grape Development of production gathering and processing system
Overall costs of the Project	USD 442 569.2
The Break-even point of Project	4years
The Proposal of Investment's activity	Soft loans
<b>INVESTMENT'S PROPOSAL №6</b>	
Name of the Project	Gardening development
The purpose of the Project	Development of complex practical-scientific activities on gardening development , support the establishment and development of medium business in this sphere through re-profiling of 20ha submountain massive of Panj jamoat, Qumsangir district Khatlon region
