INVESTMENT'S PROPOSAL №1

Name of the Project	"Elaboration and construction of plant for production of shaped rolled iron, metal products and mass details with applying of casting-rolling aggregate"
The purpose of the Project	Organize with Russian electro-technological company (Yekaterinburg) a joint mini-metallurgical plant for production of shaped rolled iron, metal products and mass details with applying of casting-rolling aggregate.
The brief description of the Project	Perspective direction in satisfaction of relatively lower needs of countries public economy in shaped rolled iron, metal products and metal half-finished product is construction of mini-plan for production of smaller consignments of shaped rolled iron, metal products, procurements and mass details.
Overall costs of the Project	USD15 900 000
The Break-even point of Project	5 years
The Proposal of Investment's activity	Direct Investment

INVESTMENT'S PROPOSAL №2

Name of the Project	Establishing a joint venture for production of cotton yarn of pneumatic-mechanic method of spinning, with installation of technological equipment including preparing, combing, two ribbon transitions and one spinning transition.
The purpose of the Project	Starting a new production of cotton yarn by pneumatic-mechanic method of spinning for weaving purposes.
The brief description of the Project	Spinning production is specialized for production of card yarn for weaving, using pneumatic-mechanic spinning machines PPM-120-A1M. The linear densities of the yarn produced are: 20 Tex (#50/1) 29 Tex (#34,4) 50 Tex (#20)
Overall costs of the Project	USD 4 900 000
From them:	USD 2 500 000
Own means	USD 2 400 000
The external investments	
The Break-even point of Project	The Project needs the feasibility study
The Proposal of Investment's activity	Joint venture, Direct Investment

INVESTMENT'S PROPOSAL №3

Name of the Project	Construction of the textile enterprise
The purpose of the Project	The construction of cotton-fiber processing enterprise
The brief description of the Project	Construction of a cotton-fiber processing enterprise for 5000 t per year The organization of new workplaces for 150 people
Overall costs of the Project	USD 21.2 mln.
From them:	
Own means	USD 4.9 mln.
The external investments	USD15.8 mln.
The Break-even point of Project	6 years
The Proposal of Investment's activity	Joint venture, Direct Investment

INVESTMENT'S PROPOSAL №4

Name of the Project	Reconstruction of textile CJSC «Resanda»
The purpose of the Project	Reconstruction of cotton processing
The brief description of the Project	Reconstruction of cotton processing enterprise for 3500 t per a year up to finished textile for internal and foreign trade The organization of new workplaces for 1500 people
Overall costs of the Project	USD 25.5 mln.
From them:	
Own means	USD 1.2 mln.
The external investments	USD 24.3 mln.
The Break-even point of Project	6 years
The Proposal of Investment's activity	Joint venture, Direct Investment

INVESTMENT'S PROPOSAL №5

Name of the Project	Construction of the textile enterprise
The purpose of the Project	The construction of cotton-fiber processing enterprise
The brief description of the Project	The construction of cotton-fiber processing enterprise for 5000 t per year up to finished textile The organization of new workplaces for 1000 people
Overall costs of the Project	USD 36,3 mln.
The Break-even point of Project	6 years
The Proposal of Investment's activity	Joint venture, Direct Investment

INVESTMENT'S PROPOSAL №6

Name of the Project	Joint sewing enterprise
The purpose of the Project	Reconstruction introduction of modern technology, sale organization.
The brief description of the Project	Organization of sewing enterprise for children goods production on the basis available production area
Overall costs of the Project	USD 450000
From them:	
Own means	USD 50000
The external investments	USD 400000

The Break-even point of Project	2 years
The Proposal of Investment's activity	Joint venture, Direct Investment
INVESTMENT'S PROPOSAL №7	
Name of the Project	Enterprise of natural wool washing
The purpose of the Project	Wool fiber producing
The brief description of the Project	Enterprise for primary processing of 3000 t of natural wool per year.
Overall costs of the Project	USD 2 mln.
From them:	
Own means	USD 0.4 mln.
The external investments	USD 1.6 mln.
The Break-even point of Project	2 years
The Proposal of Investment's activity	Joint venture, Direct Investment
INVESTMENT'S PROPOSAL №8	
Name of the Project	Technical equipment for cattle and small cattle skin processing and merino processing.
The purpose of the Project	a) Construction of the enterprise on fur and skin processing. b) Local raw material processing.
The brief description of the Project	Organization of the enterprise on cattle and small cattle fur processing.
Overall costs of the Project	USD 1 mln.
From them:	
Own means	USD 0.1 mln.
The external investments	USD 0.9 mln.
The Break-even point of Project	2 years
The Proposal of Investment's activity	Joint venture, Direct Investment
INVESTMENT'S PROPOSAL №9	
Name of the Project	Foundation of the enterprise on production of coagulant for drinking water and sewage disposal.
The purpose of the Project	The main object of the project is receiving the main product of coagulant about 10-15 tones per day for purification of drinking water and 5-7 tones of pure kaolin for production of porcelain industry. In future the production of coagulants is planed about 20 tones.
The brief description of the Project	Character is based on the exploitation of proper research works directed to exploitation of such local raw material resources of the Republic of Tajikistan like nightline syenite, granite, bentonite, kaolin. Production technology of coagulants is unwasteful. By – products can be used as raw material for production of other valuable products in the industry.
Overall costs of the Project	USD 70 mln.
From them:	
Own means	USD 20 mln.
The external investments	USD 50 mln.
The Break-even point of Project	The Project needs the feasibility study

The Proposal of Investment's activity	Joint venture, Direct Investment
INVESTMENT'S PROPOSAL №10	
Name of the Project	On release of sports socks with complex requirements of figures
The purpose of the Project	Establishment new produce
The brief description of the Project	Production on joint-stock company " Nafisa", after disintegration of the USSR, starting since 1991, it was steadily reduced down to 1997. It is enough to note, that output has made in 1997 of all 400 thousand pairs, i.e. the enterprise practically did not work. Since 1998 began revival of manufacture and in current 2005 joint-stock company " Nafias " will let release not less than 5,5 million pairs stocking and socks' products, or output will increase for 8 years more than in 13,5 times. Now here at the enterprise work 360 people. Enterprise releases: - children's socks, half stockings (golf) and stockings, female and man's socks. All production is issued from a pure cotton yarn and only some models of assortment with the insignificant maintenance of elasticity.
Overall costs of the Project	USD 1.833.750
The Break-even point of Project	3 years
The Proposal of Investment's activity	Joint venture, Direct Investment
INVESTMENT'S PROPOSAL №11	
Name of the Project	"Production of consumer and industrial-technical goods from plastic"
The purpose of the Project	Enlargement of production of consumer and industrial-technical goods from plastic.
The brief description of the Project	Technological opportunities of the industrial company "Tajiktextilmash" allow to increase volumes of production of plastic goods and significantly enlarge assortment of consumer and industrial goods
Overall costs of the Project	USD 1 700 000
The Break-even point of Project	The Project needs the feasibility study
The Proposal of Investment's activity	Joint venture, Direct Investment
INVESTMENT'S PROPOSAL №12	
Name of the Project	Restoration of production in the Joint Stock Open Company "TRANSFORMATOR"
The purpose of the Project	The project envisages conducting of necessary repairing-restoring works, replacement of morally obsolete equipment, acquisition of spare parts and materials for loading of existing capacities of the company, satisfying the demand for transformers inside the country and enlargement of export to other countries.
The brief description of the Project	The project envisages conducting of repairing-restoring works, replacement of morally obsolete equipment, acquisition of raw materials, spare parts and components for loading of existing capacities of the

	company, extending of nomenclature of products depending on standard size and standard performance and capacity of transformers in accordance with consumer demand inside the country and abroad.
Overall costs of the Project	USD 3.1 mln.
From them:	
Own means	USD 0.6 mln.
The external investments	USD 2.5 mln.
The Break-even point of Project	The Project needs the feasibility study
The Proposal of Investment's activity	Joint venture, Direct Investment

INVESTMENT'S PROPOSAL №13

Name of the Project	Production of cellulose and paper from cotton fiber waste (lint)
The purpose of the Project	Starting a new production of cellulose and paper from cotton fiber waste (lint)
The brief description of the Project	<p>Introduction of a new technology for processing cotton fiber waste, including deep processing of lint by means of strong chemicals:</p> <p>NaOH - 100% solution of sodium hydroxide NaOCl – bleaching solution of sodium hypochloride H2SO4 - sulfuric acid</p> <p>These chemicals are capable of dissolving lint to cellulose with thorough rinsing. Cellulose in the form of fibrous paste is the source material for producing paper, napkins, etc.</p>
Overall costs of the Project	USD 25.2 mln.
The Break-even point of Project	The Project needs the feasibility study
The Proposal of Investment's activity	Joint venture, Direct Investment

INVESTMENT'S PROPOSAL №14

Name of the Project	Reconstruction and renewing the old equipment.
The purpose of the Project	The main aim of the project is put in work general work power, renewing some parts of old equipment, set up – to – date high – productive western equipment, improving the quality of producing products.
The brief description of the Project	<p>JST " Resanda" Kurgan-Tybe is situated on the town line in ploughing ground of Karl-Marx s/h. Bokhtar distict. It's borders are: from north-auto road of Kurgan-Tybe-Vakhsh, from east-housing block of factory workers and specialists, from south-cotton field, from west-territory of Gas-department. From western side of industrial ground (along the irrigation canal) there is automatic pipe line with diameter 1200 mm. The railway station is situated ru 15 km, north-east part of Kurgan-Tybe, not far from Sarband it one of branch offices is in Sarband and has the general work power 3000 schpindel/th.</p>
Overall costs of the Project	USD 3.6 mln.
The Break-even point of Project	The Project needs the feasibility study
The Proposal of Investment's activity	Joint venture, Direct Investment

INVESTMENT'S PROPOSAL №15

Name of the Project	Increasing manufacture of hosieries and finishing their annual volume up to 7, 2 million pairs
The purpose of the Project	More effective utilization of the available equipment, updating and expansion of assortment of released stocking and socks' products using local raw material.
The brief description of the Project	JST " Resanda" Kurgan-Tybe is situated on the town line in ploughing ground of Karl-Marx s/h. Bokhtar distict. It's borders are: from north-auto road of Kurgan-Tybe-Vakhsh, from east-housing block of factory workers and specialists, from south-cotton field, from west-territory of Gas-department. From western side of industrial ground (along the irrigation canal) there is automatic pipe line with diameter 1200 mm. The vailway station is situated ru 15 km, north-east part of Kurgan-Tybe, not far from Sarband it one of branch offices is in Sarband and has the general work power 3000 schpindel/th.
Overall costs of the Project	USD 191800
The Break-even point of Project	The Project needs the feasibility study
The Proposal of Investment's activity	Joint venture, Direct Investment
